About MouseMover

The software, which move your mouse pointer on the screen randomly!

T his software is for the gents which are unable to prevent the Windows Computers and Monitors to sleep. Maybe you work in one company, which use Active Directory group permissions policies to set the Sleep values and to prevent changing it! Our software will help you solve this situation. You do not need to have administrative rights to your system.

Installation Steps

After you have download our software, you need to start the installation process. To do that, you need to locate our MSI installation package (**MouseMover.msi**) and run it. To do that you need to right click on it and to choose Install

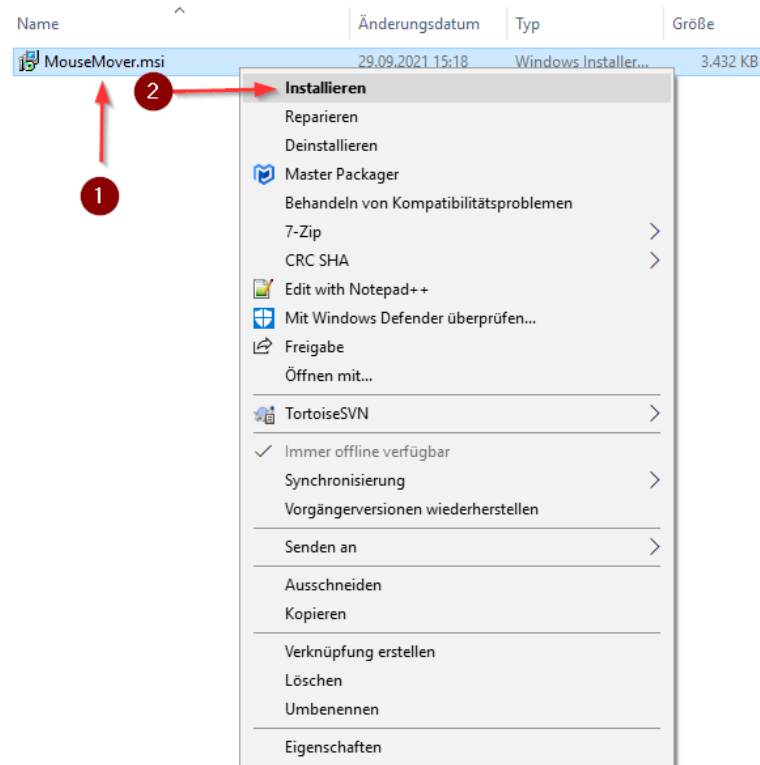

FIGURE 1.1 Find the MSI package, right click it and choose install.

The UAC Window will prompt, choose yes. That is it!

How to use it

To start MouseMover application you only need to double click the shortcut on your desktop!

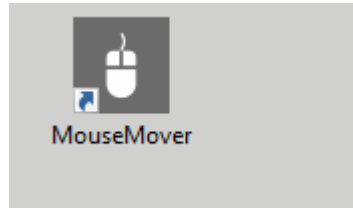

FIGURE 1.2 Double click this shortcut on your desktop. The MouseMover will start directly!
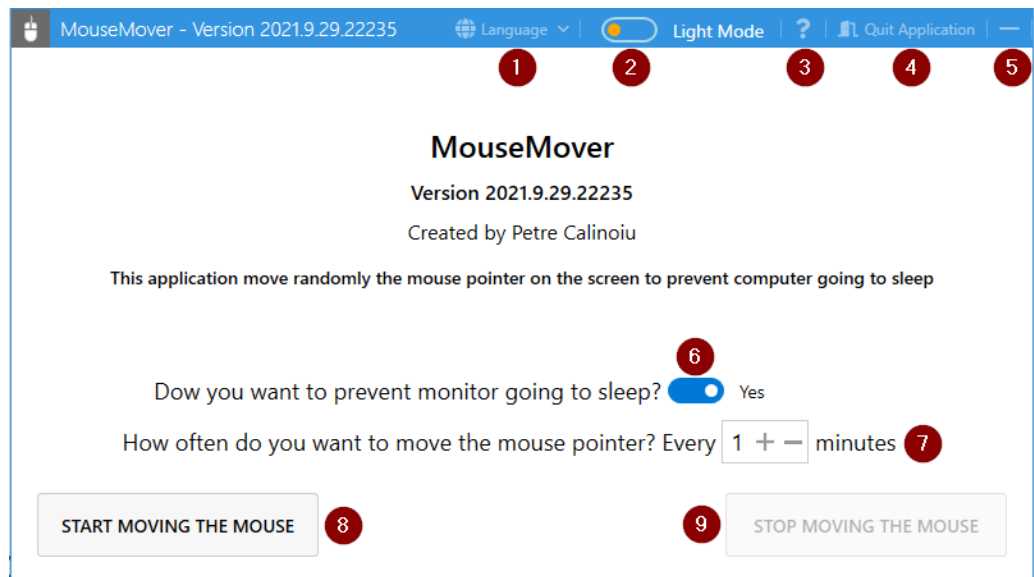

Here is the interface explained:

FIGURE 1.3 MouseMover User Interface

1. **Language Selector**. Initially, the application start in your Windows OS language. With this selector are you able to choose between German, English, Spanish and Romanian. More languages will follow in one of the next versions.

2. **Color Mode** MouseMover support Dark Mode. Here you can switch between Light and Dark Mode.

3. **User Guide** Open this User Guide!

4. **Quit Application** Normally MouseMover close to tray. With this button you can complete close this application.

5. **Minimize MouseMover** do not minimize to taskbar like other application. MouseMover minimize to tray! You can find the tray near the Date and Time information on the right side of the taskbar!

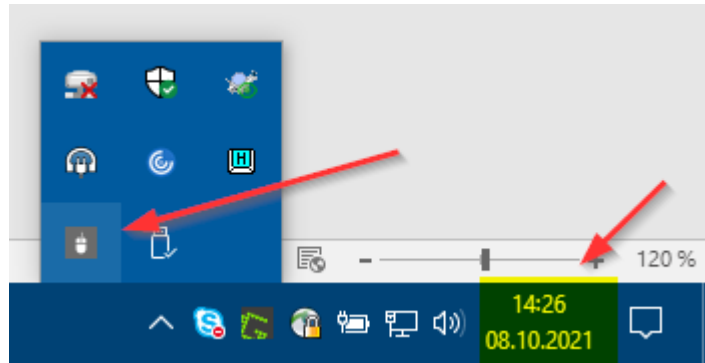

FIGURE 1.4 MouseMover Tray Icon

6. **Sleep Mode** On default MouseMover only start moving your mouse pointer. If you switch this on, the monitor will not enter in sleep mode, also your computer will not lock your session.

7. **Minute Counter** With this counter you can set how often your mouse pointer need to move.

8. **Start moving the mouse** This button start to move the mouse at the defined *interval* (on step 7) and close the application to tray.

9. **Stop moving the mouse** This button stop moving the mouse. Initially this button is disabled; it activates himself first after you click the *Start moving the mouse* button!

How to work with the Tray Menu

1. Open Tray Menu with a click on the right mouse button.

FIGURE 1.5 MouseMover Tray Menu

2. The lower option close the MouseMover application completely.

3. The upper option restore the MouseMover User interface. A double click on the MouseMover Tray Icon have the same effect.
